

# CI/CD Benefits for us

*Increase Revenue*

*Reduce Cost*

*Protect Revenue*

*Avoid Cost*

*Increase Revenue*

Deploy to  
Production

Team Test

Deploy more, deploy fast to Production

**Generate more value quickly releasing the new features**

No more manual check when deploying

**Decrease features time to market**

Client Test

*Reduce Cost*

Compile/Lint

Quickly catch and fix compile errors

**Spend less time on new code bugs**

Create  
Infrastructure

Cleanup automatically infrastructure after deploy

**Reduce infrastructure costs by deleting the unused resources**

*Protect Revenue*

Smoke Test  
in Production

Automate your Smoke Tests

**Prevent crashes after deployments**

Rollbacks

Rollback automatically after Jobs fail

**Revert your changes if checks fail**

*Avoid Cost*

Run Unit  
Tests

Automatically run Unit Tests

**Deploy less code with bugs in production and  
reduce testing time**

Verify  
Dependency  
Security

Check for Vulnerabilities in your projects

**Avoid security issues and PR stunts**
